HOW TO...

make a Pop Up Book Card

Measure inside of your square folded card—
cut patterned paper to fit inside leaving a 1/4"
edge to the top and bottom.

My card was 6 3/4" square so I cut my
paper 6 1/2" keep the length at (11 3/4")

Base Card 6 3/4" x 13 1/2"

Patterned Paper 6 1/2" x 11 3/4"

Measure 3/4" down on short edge of
patterned paper and 3/4" up from bottom—
mark lightly with a pencil—repeat on oppo-
site edge.

Place short edge of paper onto Eazi-score
board and mark Line 3 (2") - repeat at each
side top and bottom

Cut along the marked line so that you have a
slit 3/4" down and 2" in on all sides.

Scoring

Place short edge of paper to
guide bar on Eazi-score and
score Line 7 from top of
paper to bottom

Now score between the cut
lines

Score lines 3 and 4—turn
paper and repeat

Next scoring is on the 3/4"
strip at the top and bottom of
your paper.. Keeping short
edge to guide bar score DL
line turn paper and repeat

Folding

Mountain and Valley fold along your
paper starting with a Valley. The 3/4"
strip will fold opposite to the main paper.
Glue side sections only also top and bot-
tom strip up to the 1st score line— place
centre section to centre of white square
card— keeping paper flat, glue in place.
Cut white card for stamping - matt and
layer with suitable contrast paper
Add the embellishments and sentiment of
your choice.

I had seen this card on blogs with lots of
measuring so decided that there had to be
an easier way— hope that you enjoy your
Pop Up Book Card
