

**How to print in
 “Another Colour”
 Gold /Silver/Bronze
 In fact you can print in
 any colour**

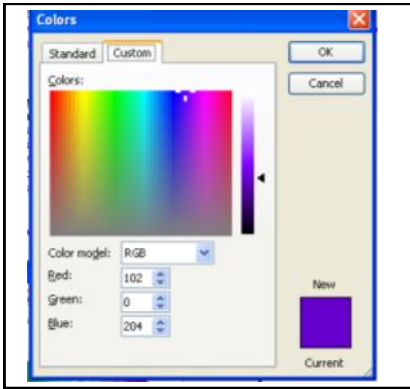

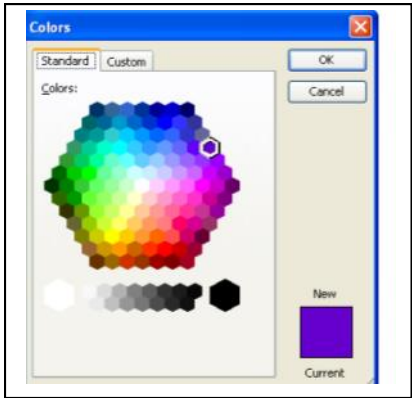

Have you ever wanted to print in a colour that is not on your computers Print palette?
 There is a kaleidoscope of colours that we can use to suit our projects.

I have listed the decimal equivalents to guide you through some very lovely colours. I hope that you have fun and experiment to make your own favourite colours

Move cursor over font colour icon ‘A’ left click on the downwards arrow

This window will open—at the bottom you will see the wording ‘More Colors’ Left click on this....

A window will open showing a colour palette – at the top of the colour palette you will see the word ‘Custom’ left click on custom

This window will open showing you a rainbow of colours—at the bottom of the window are 3 columns **Red Green Blue** this is where we will add your new colour range by inserting the decimal equivalent of that colour.

*I have listed some of my favourite colour options for you to try.
experiment – make a note of the colour combos that you like..
I hope that you will find this chart useful*
